MEMKO and AEA sign agreement to provide Engineering Support to Aerospace, Aviation and Defence organisations

Melbourne, Australia. — March. 11, 2009 — MEMKO PTY LTD, an Australian-based organisation providing services and products to the aerospace, aviation and defence industries announced today the signing of an agreement with Aeronautical Engineers Australia (AEA), a company providing engineering solutions to the Australian Aviation industry sector to jointly develop and deliver Engineering Design, Analysis, Test and Approval Solutions to Australian and International Aerospace, Aviation and Defence organisations.

As MEMKO Director Miro Miletic notes, "Aerospace, Aviation and Defence organisations all over the world have benefitted greatly from the utilisation of engineering services. Recognising the growing engineering services market need, MEMKO is pleased to offer Engineering Solutions supported by its comprehensive aerospace, aviation and defence industry knowledge and AEA extensive engineering capability, regulatory approvals and capacity."

AEA is a well established engineering organisation in the Australian Aviation sector and the intent is to grow the business by addressing the requirements of the global Aerospace and Australian Defence industry sector.

"Prior to founding Memko, I had the opportunity to work with aerospace, aviation and defence organisations that have successfully utilised Engineering Services as a solution to deliver project based outcomes or as a cost effective way of increasing internal technical capability and capacity," said Memko Founder and Director Miro Miletic. "Engineering solutions by AEA address the industry need for cost effective on time delivery and we are looking forward to working with such a forward-thinking company and representing its solutions to Aerospace, Aviation and Defence organisations."

About Design, Analysis, Test and Approval Solutions

Aeronautical Engineers Australia is providing design, analysis, testing and approval services to the Australian aviation industry for over 30 years and continues to deliver affordable solutions for customers, regardless of size. AEA is authorised by the Civil Aviation Safety Authority of Australia under CAR35/36 and the Civil Aviation Authority of Papua New Guinea for approval of the design of modifications and repairs. AEA is also authorised to approve Australian Parts Manufacturer Approval (APMA) design data and designs compliant repairs and modifications to foreign registered aircraft for submission to local airworthiness authorities for approval.

With over 30 professionally qualified engineers, office locations in Sydney, Perth Adelaide and Brisbane and extensive regulatory approvals and design delegations MEMKO and AEA are able to support your aerospace, aviation and defence industry requirements.

About MEMKO

MEMKO offers services and products specifically tailored to the requirements of Aviation, Aerospace and Defence organizations.

MEMKO supports businesses in matters relating to strategic planning and business development, engineering and technology solutions, LEAN product development and manufacturing training and is the official Asia Pacific reseller of Intercim manufacturing operations management (MOM) software. About AEA

Aeronautical Engineers Australia (AEA) was founded in 1978 to meet the emerging need for aeronautical engineering support for the Australian general aviation community.

Today, AEA has grown to become one of Australia's leading aviation consultancy and aircraft design firms offering engineering solutions to special mission operators, defence, aeromedical operators, and aircraft manufacturers, as well as to airlines through its sister company Airline Technical Services.

In addition, AEA provides a large range of aircraft standard products and modification kits as well as approved manufacturing capabilities through partner businesses.

AEA is a wholly owned Australian company and operates to ISO 9001 standard, visit
